

CELINE JOIE V. BUENAVENTURA

Senior Software Engineer | Full Stack Engineer

0939 294 8571 | cjvbuenaventura@gmail.com | San Pedro Laguna | linkedin.com/in/cjvbuenaventura

PROFESSIONAL SUMMARY:

Software Engineer with 4 years of experience delivering end-to-end software solutions across frontend, backend, and mobile platforms. Skilled in building scalable applications using Flutter, React, Next.js, NestJS, PostgreSQL, and Google Cloud Platform, with hands-on experience in application architecture, API development, CI/CD, observability, and production support. Experienced in modernizing legacy systems, optimizing application performance, and collaborating with cross-functional teams to deliver secure, maintainable, and business-driven software in Agile environments.

SKILLS:

Programming Languages: Dart, Javascript, TypeScript, SQL

Frontend: Flutter, ReactJS, NextJS, HTML5, CSS3

Backend and APIs: NestJS, REST APIs, PostgreSQL, Google Cloud Services, Docker

Testing: Flutter Test, Jest, React Testing Library (RTL), API Testing, Unit Testing

AI Assisted Development: Claude, OpenAI

Monitoring and DevTools: Firebase Performance, Sentry, Figma, Git, Github, Bitbucket, Visual Studio Code

Security: Secure Development Practices, Secret Management, Vulnerability Assessments

Collaboration: Jira, Confluence, Slack, Agile (Scrum/Kanban)

WORK EXPERIENCE:

Wizy Software Labs Inc.

Project: WizyVision, an app-building platform designed to enhance the efficiency of frontline workers by offering real time-insights into field operations and simplifying data collection through image based workflows.

- **Senior Software Engineer** (April 2026 – Present)
- **Mid Software Engineer** (August 2023 – April 2026)
- **Junior Software Engineer** (September 2022– August 2023)

Technical Leadership & Innovation

- **Technical Leadership:** Mentored junior engineers through technical guidance, code reviews, and knowledge sharing to promote engineering best practices and maintain code quality.
- **Technical Delivery:** Coordinated releases, represented the Philippine engineering team in cross-regional technical discussions, and contributed to solution design, sprint planning, and effort estimation.
- **AI Enablement:** Developed an internal internationalization tool using Google AI Studio and leveraged Claude to accelerate development workflows and documentation.

Web Development

- **Architecture & Scalability:** Spearheaded the migration from legacy HOC-based patterns to atomic state management using React Query, improving application scalability, maintainability, and data-fetching performance.
- **Feature Development:** Developed and maintained core application features including authentication, dashboards, PDF report generation, file uploads, audit logs, pagination, internationalization (i18n), and REST API integrations.
- **Performance, Testing & Monitoring:** Optimized complex form workflows by migrating from Formik to React Hook Form, developed unit and component tests using Jest and React Testing Library (RTL), and implemented application monitoring with Sentry and BigQuery to improve reliability and accelerate root-cause analysis.
- **Deployment & CI/CD:** Managed deployments across Development, Staging, and Production environments using CI/CD pipelines to support reliable and automated software releases.

Backend Development

- **API Development & Integration:** Designed, developed, and integrated RESTful APIs to support complex inspection workflows, enabling seamless communication between web/mobile applications and backend services.
- **Cloud Services & Analytics:** Developed and deployed an analytics service on Google Cloud Run that processes BigQuery data to power dashboard reporting, while building event-driven notification services using Google Cloud Pub/Sub and Cloud Run.
- **Database & Data Management:** Managed database schema migrations and model updates, ensuring data integrity and zero-downtime deployments during application enhancements.
- **Monitoring & Automation:** Leveraged Claude to automate weekly monitoring and operational reporting, improving engineering visibility and reducing manual effort.

Mobile Development

- **Core Mobile Features:** Experienced in implementing authentication, offline persistence, gen AI integrations, form handling events, high-fidelity UI, and hardware-level features such as camera and nfc
- **Architecture and Engineering:** Led the migration of a legacy GetX codebase to Riverpod, improving state predictability and long-term maintainability. Developed reusable form component using Provider Overrides, enabling data injection and reducing code redundancy.
- **CI/CD & Deployment:** Fully owned mobile release operations for iOS (App Store) and Android (Play Store), and established CI pipelines to automate quality gates from the ground up.
- **Testing Foundation:** Wrote unit, widget, and integration tests with Flutter test and mocks, reaching 80% coverage on core modules; tests run as blocking CI quality gates
- **Performance & Observability:** Achieved a 99.82% crash-free rate by architecting a unified monitoring framework using Firebase and Sentry, leveraging Claude workflows to accelerate root-cause analysis

PROJECTS AND CONTRIBUTIONS:

SAN PEDRO WEBSITE REVAMP

Next JS | Shadcn | Vercel

- Open-source redesign of the City of San Pedro's website to improve accessibility
- Applied modern web design principles to enhance digital government services
- Managed community-driven development through open-source collaboration

MESSAGE TRANSLATOR WEB APPLICATION

Google AI Studio

- Internal tool designed to automate the i18n workflow for engineering teams.
- Automated the generation of .arb and .js strings, replacing manual spreadsheet entries
- Reduced translation errors and significantly cut down manual developer effort

MOBILE APPLICATION PLAYGROUND

Flutter | Dart | Firebase | Github Actions

- A technical sandbox for experimenting with advanced hardware integrations
- Implemented NFC Scanning, Document Scanning, Real-time Location Services using Google Maps, Google Authentication, Capturing and Scanning files using Flutter Camera
- Integrated automated deployments using Github Actions

C | Line (Personal Portfolio)

HTML | CSS | Javascript

- Personal website built to showcase technical projects
- Designed a responsive UI to demonstrate layout principles

EDUCATION & CERTIFICATIONS:

Bachelor of Science in Computer Engineering

Polytechnic University of the Philippines

Cum Laude

November 2022

Google Associate Cloud Engineer

June 2023
